

Environmental Policy Sweden Meetx AB

Meetx works to create successful conferences and congresses. Environmental work is conducted from a holistic perspective where we start from Meetx's own operations, but also take responsibility for the environmental aspect in the projects we carry out on behalf of our customers

Meetx is part of the Swedish Exhibition & Congress Centre Group and our environmental policy is therefore based on the Swedish Exhibition's sustainability policy, where sustainability is in constant focus of all the Group's operations.

We strive to continuously reduce our environmental impact. We do this by:

- Saving energy, water and natural resources.
- Climate-compensate our own business trips by air by investing corresponding emission costs in sustainability improvement measures within the business.
- Work to always improve our environmental work and to exceed applicable laws in the environmental field.
- Constantly strive to run our business, purchasing and procurement so that they contribute to the sustainable development of both the local and global society.
- Communicate our environmental work in a way that increases the commitment and environment knowledge of our own employees, customers and suppliers.
- Influencing our customers to choose hotels, conference facilities and other suppliers that work actively with the environment and offer environmentally friendly products.
- Offer innovative digital solutions for both services within the projects and as an alternative to physical meetings.
- Offer an environment that promotes the well-being of our conference participants and employees.

By acting in accordance with this policy, our customers and conference participants can take part in our activities and contribute to our joint efforts to create a sustainable society.

We hereby adopt this policy.

A handwritten signature in blue ink, appearing to read "Maja L.", is written over a horizontal line.
